## HOW THE BULLS HAVE BEEN MANAGED

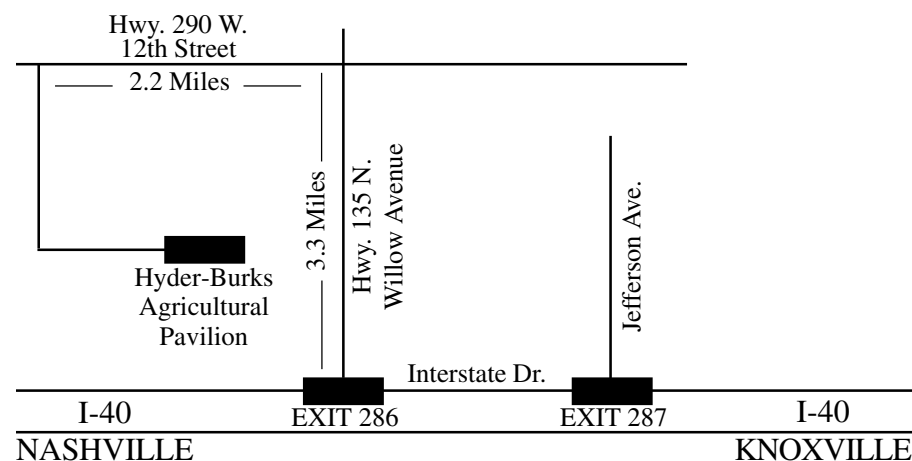

The Bulls were grouped together in large grass pastures in late July, and fed a high roughage ration, and free choice grass hay for 84 days. The purpose of this feed test is not to obtain maximum gains and high yearling weights, but to develop a sound, functional, athletic set of breeding bulls. Yearling weights and ultrasound carcass measurements were taken in November and processed by the American Angus Association. The Bulls have been on a limited high roughage ration with free choice grass hay since November 1, 2010.

Genetic Excellence Bull's Health Program 2-3 weeks prior to delivery - Vaccinated with Bovi - Shield Gold FP 5L5 and Ultrabac 8. At delivery given a booster vaccination of Bovi-Shield GOLD FP 5L5, Ultrabac 8, and dewormed with injectable Ivermectin. 30 days prior to sale the bulls were given a booster of Bovi-Shield GOLD FP 5L5, VIBRIN, Ultrabac 8, Lepto-Hardjo, and dewormed and deliced with injectable Ivermectin.

### All Bulls meet or exceed TAEF Cattle Genetics EPD Requirements

Auctioneer - **Eddie Burks** TN. AUCT. LIC. # 4990

## Genetic Excellence Angus Bull Sale

**Saturday, January 1, 2011**

**Noon CST**

**Hyder-Burks Agricultural Pavilion  
Tennessee Tech University • Cookeville, TN**

### 70+ Registered Angus Bulls

All bulls selling are A.I. Sired and qualify for TAEF Genetics cost share program. They will pass a breeding soundness exam, have a negative test for Bangs, Johnes, BLV, and BVD PI. Ultrasound carcass data will be collected on each bull and that data will be available sale day. All Bulls are AMF, NHF and/or CAF by test or parentage and sell under the suggested Terms and conditions recommended by the American Angus Association.

**125 + Commercial Angus, Angus Influence Heifers.
